

SKOOKUM

(SKOO-kuhm)
Chinook (Native American)
meaning "Strong"

Designed and built in the Northwest, this bike handles the muddiest, rootiest trails without missing a beat. Carve up those switchbacks, climb without losing traction and blast by 'em on the downhills. We ride what we build and we build stuff that WORKS.

PRODUCTION ALUMINUM

Specs

Born out of the need for a truly versatile, full-suspension "cross-country" bike, this machine sports the following features.

- **Semi-unified, fully active full-suspension design.** Pedaling AND braking forces are isolated and do not affect suspension travel.
- **Massive, hollow main pivot.** High lateral rigidity, light weight and low maintenance.
- **Machined pivot/bottom bracket piece** for excellent tire/mud/crank/chainring clearance, maximum rigidity and light weight.
- **Custom geometry** that handles high-speed descents as well as slow, technical single-track.
- **Designed to excel with any 2-4" travel fork and 3.25" travel rear suspension** (RockShox Coupe Deluxe w/external damping adjuster).
- **Standard dimensions & specifications** are compatible with the components YOU want.

Weight 3,060 g (6.75 lb.) Medium including RockShox Coupe Deluxe rear shock
